PROFESSIONAL EXPERIENCE

Preesoft, Full Stack Developer - 1 year 05/2025 – Present | Lahore, Pakistan

- **SHL-LONDON (Full Stack):** Engineered a comprehensive HR management platform to streamline workforce and holiday tracking. Designed and developed robust RESTful APIs using Laravel, implementing strict Role-Based Access Control (RBAC).
- **Cognify (Full Stack):** Building full-featured applications with React.js and Node.js that connect complex frontend logic with secure backend APIs, also make a payment integration and a different dashboard for role-based access control.
- **Bookify (Full Stack) ⚡** : Developing the backend architecture and crafting optimized RESTful APIs while also creating dynamic frontend interfaces using React.js and Material UI for a seamless user experience.
- **Talent Bridge (Frontend) ⚡** : Building dynamic and responsive user interfaces using React.js, focusing on component reusability and intuitive User Experience (UX).

Rizviz International Impex, ServiceNow / Full Stack Developer - 1 year

05/2024 – 04/2025 | Lahore

- Designed and customized ITSM modules (Incident & Change) to automate enterprise workflows.
- Developed custom widgets for the Service Portal using HTML, CSS, and JavaScript, aligning with modern UI/UX standards.
- Automated complex business processes using Business Rules, Flow Designer, and Script Includes.
- Integrated ServiceNow with third-party tools via REST APIs, ensuring seamless data flow across platforms.

EDUCATION

Bachelors of Computer Science, Central Institute of Management and Science

2020 – 2024 | Lahore, Pakistan

- GPA: 3.41/4
- Relevant Courses: Software Engineering, Operating Systems, Algorithms, Mathematics, Statistics, Discrete Mathematics.

Intermediate in FSc Pre-Engineering, Punjab Group of Colleges

2018 – 2020 | Lahore, Pakistan

- Grade: B

SKILLS

AI & Automation — Proficient

Gemini CLI, Cursor AI, Prompt Engineering, Antigravity, Stitch

Javascript — Expert

I used it to make apps on both the front end and the back end.

Reactjs, Nextjs with tailwindcss — Proficient

I use these to build the front end of all my apps, from a full website that is standard in the industry to a small landing page. I also use react on the mobile end side now with reactnative cli.

Python — Competent

I used it to learn about programming in general and to make a Jarvis app. I also used it to make the back end of my apps with FastAPI and Django.

mysql, postgres with prisma — Amateur

I used it to build the backend of my company project called Bookify. There, I learned how to use these databases with Prisma.

DevOps & Tools — Competent

Docker (for containerization), Linux (as my main OS), virtual machines (for testing different operating systems), Git and GitHub, REST APIs, and WebSockets (for making a real-time chat app).

TypeScript — Competent

I now use it a lot when I build the front or back end of my apps in JavaScript because it's easy to debug.

ReactNative-Cli — Amateur

I made an ecommerce app that lets you pay and used the redux toolkit and redux to manage the API and connect it to a real backend.

PHP — Amateur

I used it on a landing page and also on a four-page website with a MySQL database for submitting forms.

nodeJs with expressJs and mongodb — Proficient

I used this as my main backend stack, with MongoDB as the backend.

LANGUAGES

Urdu

Fluent

English

Conversational proficiency

RECENT PROJECTS

Gym Management SaaS ⚡, (Django & React)

- Built a complete Gym Management platform using Django (Backend) and React with Redux Toolkit (Frontend).
- Implemented member subscription tracking, workout planning modules, and attendance management systems.

Fashion E-commerce App ⚡, (React Native CLI & Node.js)

- Developed a high-performance mobile commerce app using React Native CLI featuring dynamic product listing and category filtering.
- Engineered a scalable Node.js/Express backend with JWT authentication and MongoDB for order and user management.

Nexus Store ⚡, (MERN, TypeScript)

- Full-stack e-commerce platform using Next.js (frontend) and MERN stack (backend).
- Implemented TypeScript, JWT authentication, and an Admin Dashboard for user, product, and order management.
- Used Redux Toolkit for state management and RESTful APIs for backend operations.

Nexus Chat ⚡, (Real-Time Application - MERN)

- Developed a real-time chat application with a structured frontend-backend architecture.
- Integrated WebSockets for real-time messaging and instant data updates.
- Implemented Cloudinary for secure image storage and used Redux Toolkit for global state management.

Book-Store ⚡, (MERN Stack)

- Full-Stack Development: Built a scalable E-Book Store using the MERN stack and TypeScript, implementing MVC architecture for maintainable and clean server-side logic.

- **Secure Data & Media:** Integrated JWT for robust user authentication and leveraged Cloudinary with Multer for efficient cloud-based file and image management.
- **State & UI Management:** Developed a responsive frontend using Tailwind CSS, optimizing data synchronization and API performance with React Query and Axios.

Full-Stack E-commerce API , (MERN Stack)

- **Architected Scalable Backend:** Developed a modular RESTful API using Node.js and Express.js to handle core eCommerce logic, including product catalogs and order processing.
- **Secure Authentication & Authorization:** Implemented robust user security using JWT (JSON Web Tokens) and HTTP-only cookies to manage protected routes and user sessions.
- **Advanced Data Modeling:** Designed complex schemas with Mongoose and MongoDB to efficiently manage relational data between Users, Products, Carts, and Orders.
- **Production-Ready Middleware:** Integrated Morgan for request logging and CORS for secure cross-origin resource sharing with frontend frameworks like React.
