Professional Experience

Javascript Developer, *Rizviz International Impex*

10/2025 – 01/2026

- Developed custom UI components for the Service Portal using **HTML, CSS, and JavaScript**.
- Wrote basic JavaScript logic (Business Rules & Script Includes) to automate repetitive business tasks.
- Gained hands-on experience with **REST APIs** to fetch and send data between systems.

Lahore, Pakistan

Software Engineer, *Preesoft*

02/2026 – 06/2026

1. Cognify (Web Application)

- Built a web application using **React.js** and **Node.js** to understand how frontend and backend communicate.
- Learned how to implement secure user login and created separate dashboards for different user roles.
- Gained hands-on experience in integrating a basic payment gateway.

Lahore, Pakistan

2. Bookify (Full-Stack Project)

- Developed a full-stack project to practice backend API creation and database management.
- Designed a clean and user-friendly interface using **React.js** and **Material UI**.
- Focused on understanding RESTful API concepts and optimizing server requests for a better user experience.

3. Talent Bridge (Frontend Project)

- Focused on frontend development using **React.js** to build responsive and clean web pages.
- Learned the concept of component reusability to write clean and organized code.
- Practiced modern UI/UX principles to ensure the design is simple and easy for users to navigate.

Freelance Full Stack Developer / Independent Developer

04/2024 – 07/2025

- Designed, developed, and deployed scalable web applications using the MERN stack (MongoDB, Express.js, React, Node.js) tailored to client requirements.
- Utilized Git and GitHub for rigorous version control, maintaining clean, well-documented code repositories.
- Engineered robust backend architecture and designed efficient RESTful APIs.
- Developed highly responsive and performant frontend applications using Next.js, paired with Tailwind CSS for custom, pixel-perfect designs.

Remote

Education

Bachelors of Computer Science, *Central Institute of Management and Science*

2020 – 2024

- GPA: 3.41/4
- Relevant Courses: Software Engineering, Operating Systems, Algorithms, Mathematics, Statistics, Discrete Mathematics.

Lahore, Pakistan

Intermediate in FSc Pre-Engineering, *Punjab Group of Colleges*

2018 – 2020

Grade: B

Lahore, Pakistan

Skills

AI & Automation

Gemini CLI, Cursor AI, Prompt Engineering, Antigravity, Stitch

Reactjs, Nextjs with tailwindcss (Proficient)

I use these to build the front end of all my apps, from a full website that is standard in the industry to a small landing page. I also use react on the mobile end side now with reactnative cli.

mysql, postgres with prisma (Amateur)

I used it to build the backend of my company project called Bookify. There, I learned how to use these databases with Prisma.

TypeScript (Competent)

I now use it a lot when I build the front or back end of my apps in JavaScript because it's easy to debug.

PHP (Amateur)

I used it on a landing page and also on a four-page website with a MySQL database for submitting forms.

Javascript (Proficient)

I used it to make apps on both the front end and the back end.

Python (Competent)

I used it to learn about programming in general and to make a Jarvis app. I also used it to make the back end of my apps with FastAPI and Django.

DevOps & Tools (Competent)

Docker (for containerization), Linux (as my main OS), virtual machines (for testing different operating systems), Git and GitHub, REST APIs, and WebSockets (for making a real-time chat app).

ReactNative-Cli (Amateur)

I made an ecommerce app that lets you pay and used the redux toolkit and redux to manage the API and connect it to a real backend.

nodeJs with expressJs and mongodb (Proficient)

I used this as my main backend stack, with MongoDB as the backend.

Languages

Urdu

Fluent

English

Conversational proficiency

RECENT PROJECTS

Fashion E-commerce App, React Native CLI & Node.js

- Built a basic mobile commerce app using **React Native CLI** to learn mobile development fundamentals.
- Implemented product listing and category filtering to understand how to display dynamic data.
- Developed a backend using **Node.js, Express, and MongoDB** to learn about user registration, login security (JWT), and order management

Nexus Store, MERN, TypeScript

- Developed a full-stack e-commerce project using **Next.js** for the frontend and the **MERN stack** for the backend.
- Practiced **TypeScript** to write cleaner, error-free code and built an Admin Dashboard to manage users and products.
- Learned how to manage application state using **Redux Toolkit** and handle data using RESTful APIs.

Nexus Chat, *Real-Time Application - MERN*

- Built a real-time chat application to understand how frontend and backend work together in real-time.
- Learned and integrated **WebSockets** to enable instant messaging without refreshing the page.
- Practiced storing images securely using **Cloudinary** and managed app data smoothly with **Redux Toolkit**.

Book-Store, *MERN Stack*

- Built an E-Book store using the **MERN stack** and **TypeScript** to learn how to structure code properly using the MVC pattern.
- Implemented secure user authentication using **JWT** and learned how to upload images/files using **Multer and Cloudinary**.
- Created a responsive design using **Tailwind CSS** and practiced fetching and sync-ing data efficiently using **React Query and Axios**.
